1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 12, 14-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Innes et al (Pat. No. 6,061,565).

Innes et al teach a method for the determination of a mobile transmitting device including receiving a signal from the transmitting device (fig. 5, MS; 16) to a plurality of base stations (fig. 5, BTS1, BTS2; 26), determining the number of the plurality of base stations (fig. 5, BTS1, BTS2; 26), which received the signal, triangulating (col 5, lines 21+) the location of the transmitting device from a plurality of distance between the transmitting device and the plurality of base stations.

3. Claim 13 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Claims 1-11 are allowed.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
